

CURRENTLY

The ANTERION Multimodal Imaging Platform has been generously donated to Quang Tri Eye Hospital in Quang Tri province. This state-of-the-art platform aims to enhance the quality of diagnosis and surgical procedures for patients with cataracts, corneal issues, and anterior chamber conditions. The primary objective of this project is to improve access to affordable and quality eye care services, particularly for disadvantaged communities in Quang Tri province, with a special focus on elderly patients.

EDITO

Welcome to our inaugural newsletter, where we're thrilled to unveil a tapestry of impactful initiatives aimed at transforming lives in Quang Tri province and beyond. With a focus on enhancing healthcare accessibility, empowering local communities through sustainable tourism ventures, and enriching the lives of vulnerable populations, we're forging ahead with purpose and passion. Join us as we embark on this journey of compassion, collaboration, and lasting impact.

WHAT'S UP

Hai Lang Eyecare Mission

Another successful eyecare outreach mission was conducted in the first quarter of 2024. 17 grassroots medical workers were trained and gifted with basic eyecare equipment to serve at their Commune Health Centers. Meanwhile, over 11,000 middle school students were screened and examined. At the end of the mission, 246 pairs of glasses were gifted to the children prescribed to wear them. This is the first project that CDF partnered with the Ohio-based D.O.V.E Fund.

OTHER PROJECTS ONGOING

Chenh Venh tourism

The project for development of community based tourism at Chenh Venh village in Huong Hoa district, Quang Tri province aims to provide sustainable income for local ethnic minority people and empower women in economic development. The project is funded by US Embassy in Hanoi.

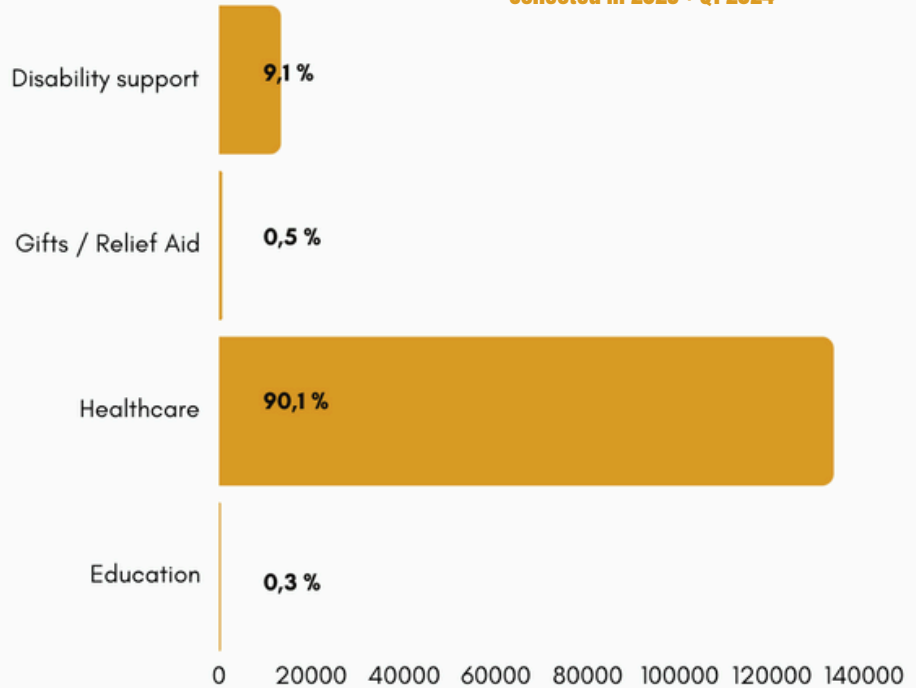

Eyeglasses for old patients

With financial support from ISEPS Global Ophthalmology Foundation, CDF has worked with Quang Tri Eye Hospital to provide eyeglasses for old patients who had surgery at the hospital since September 2023. 800 senior patients will benefit from this program. By the end of March 2024, 800 eyeglasses were gifted.
